

## ONLINE FIELD DAY Using Waste as a Resource, and Renewable Energy Opportunities for Farmers

**Dan and Amelia Bright from Amber Creek Farm & Sawmill operate a mixed farming business growing free range pigs and a timber milling operation. Join us to hear how they have designed their farming system for resilience in our changing climate**

### Topics include:

- Dan Bright on the design of Amber Creek farm including the benefits of using local sources of waste as a resource, and regenerative methods for soil improvement
- Amelia Bright on how the Prom Coast Food Collective supports local farmers and reduces food miles
- Renewable energy options for farmers including the latest on rebates, with Chris Barfoot from the Latrobe Valley Community Power Hub

To familiarise yourself with Amber Creek Farm & Sawmill prior to this event we recommend you watch these two short videos:

- Amber Creek intro and use of waste products  
<https://vimeo.com/347229866>
- Pig farming using regenerative soil practices  
<https://tinyurl.com/AmberCreek>
